Learn to Sketch Worksheet: Video 3: Mystery Object

With Francesca Pang

Sketching a Mystery Object!

Let's have fun drawing and exploring a mystery object! Use this worksheet to help guide your drawing.

Step 1: Look Closely

Take a good look at the mystery object. What do you notice first? Is it round, flat, tall, or short? Journal what you see:

What shapes do you see?

Draw or write about the shapes you find in the object:

Step 2: Draw Basic Shapes

Using a separate piece of paper, start by drawing the biggest shape you see. Use light pencil lines so you can change them later.

Step 3: Add Details

Look again and add smaller shapes and lines. What stands out? Try to draw what you see!

Step 4: Check Size and Space

Does your drawing fit on the page? Use your fingers or a ruler to check if parts are the right size compared to each other.

Step 5: Add Some Shading

Where do you see dark and light areas? Use your pencil to shade in the dark parts.

Step 6: Show Texture and Extra Parts

Do you see holes, bumps, or curves? Add those little details to your drawing.

Reflection

What was the hardest part to draw?

What do you like best about your sketch?
